Subject: NCI Bid Board Posting – Service Agreement

The Laboratory of Tumor Immunology and Biology (LTIB) functions as a multidisciplinary and interdisciplinary translational research programmatic effort with the goal of developing novel immunotherapies for cancer. The LTIB strategic plan focuses on the development of novel immunotherapeutic, not only as monotherapies, but more importantly, in combination with other immune-mediating modalities, and other conventional or experimental therapies, as part of an immuno-oncology programmatic effort. Within this effort are several research groups and a clinical trials group, and multiple collaborations with intramural and extramural scientific and clinical investigators, and with investigators in the private sector.

The National Cancer Institute plans to purchase Service Agreements for (S/N: 2AFC224450219 &) ATTUNE NXT 4 LASER and (S/N: 2AAS240100219) ATTUNEAS from Life Technologies. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine is the party can fully meet this requirement. The capability statement must be received in the contracting office by 10:30 AM on March 8, 2021 ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

Life Technologies is the manufacturer of this instrument, and their service engineers are the only ones who have the training and experience required to maintain and service the attune NxT flow cytometer.
