

RESEARCH FUNDING INFORMATION

The National Cancer Institute (NCI) offers grant funding to support cancer research, training, and career development for cancer researchers pursuing all aspects of basic, translational, and clinical cancer research. NCI's website (www.cancer.gov) provides a variety of information and resources for new applicants and future grantees to find NCI-supported funding announcements, guidance on grant application procedures and policies, and a directory of NCI Program Directors.

FUNDING OPPORTUNITIES (cancer.gov/funding)

Find NCI-supported grant opportunities, program announcements, and lists of funding opportunities supported by NCI's Divisions and Offices in various areas of cancer research.

RESEARCH PROGRAM CONTACTS (cancer.gov/researchcontacts)

Contact NCI Program Directors about funding announcements, grant applications, and investigator-initiated awards.

GRANT APPLICATION PROCESS (cancer.gov/grants)

Find information about grant application preparation, grant guidelines and policies, and the grant review process.

TRAINING OPPORTUNITIES (cancer.gov/training)

Find training fellowships and career development grants supporting cancer researchers at all levels of experience working at universities and institutes across the nation. In addition, find training opportunities offered by laboratories and offices on NCI's campuses in Maryland.

PARTNER WITH NCI (cancer.gov/researchpartnerships)

Find NCI funding for small business development and collaborations with biotechnology, learn about NCI's technology transfer program, and find funding announcements supporting clinical technology development.

For more information about NCI's future research priorities, NCI-supported programs and networks, and current NCI-funded research projects, visit:
