Executive Summary

Fiscal Year 2000 Annual Report*

BUDGET IN REVIEW

This report provides a summary of the distribution of the FY 2000 budget among the various National Cancer Institute (NCI) research programs and funding mechanisms, funding policies influencing grant awards, and comparisons with prior year allocations. Additional information on the NCI budget is accessible from the NCI Home Page (<http://www.nci.nih.gov/>).

Summary

Funds available to the NCI in fiscal year 2000 totaled over \$3.311 billion, reflecting an increase of 15% and \$420 million over the previous fiscal year. This increase represented the largest single year dollar expansion in the NCI's 63 year existence. Thus, the NCI research community was able to initiate many of the research opportunities and challenges presented in the annual NCI Budget Proposal: *The Nation's Investment in Cancer Research*.

Fiscal highlights from FY 2000 include:

- Of the \$420 million increase, over 54% --\$225 million -- was allocated for Research Grants
- The greatest number of Research Project Grants (RPG)-- 4,526 -- in NCI's history were funded
- Nearly 1/3rd of the total NCI budget supported ongoing non-competing (Type 5) RPGs
- Over 1/4th of the RPGs awarded were new (Type 1) or competing renewal (Type 2) awards
- RO1 grants were funded to the 22nd percentile
- Over 300 grants and \$67 million were funded as Small Business Innovation Research awards
- \$83 million or 20% of the FY 2000 increase was allocated for Cancer Prevention & Control
- The percent of the budget that Intramural Research represented dropped to 15.3%, down from 18% in 1996
- Staff and funds that supported the research contract effort located at the NCI at Frederick were transferred into the NCI Intramural Research program
- Research Career training activities (K awards) expanded by 1/3rd

* This Executive Summary was presented on December 5, 2000 to the National Cancer Advisory Board (NCAB) of National Cancer Institute (NCI) in response to their request for an annual budget report and is designed to be an extract of the major financial events in 2000. Further details of these events are given in the remaining sections of this Fact Book.

Distribution of the Budget by Funding Mechanism for FY 1999 and 2000

Summary Points

Of the \$420 million increase:

- \$225 million, representing 54% of the increase was allocated for the Research Grants budget mechanism; an additional \$83 million (20%) was funded through the Cancer Prevention & Control budget mechanism
- Over \$157 million or 1/3rd of the increase was provided to the Research Project Grant (RPG) category, excluding Small Business Innovation Research awards
- Within the RPG category, nearly \$114 million of the increase was allocated to cover increased expenses for non-competing grants
- 4,526 RPGs, of which 306 were Small Business Innovation Research awards, were supported
- Funds for training and career development of current and future research scientists funded through Research Career Awards grew by over 33%
- Staff and funds that supported the contract located at the NCI at Frederick were transferred into the NCI Intramural Research program in FY 2000

NCI Dollars by Mechanism for FY 1999 and 2000

(in thousands)

	1999	2000*	Change '99-00	
			Am't	%
Research Project Grants:				
Noncompeting	\$936,030	\$1,050,107	\$114,077	12%

Total NCI	2,891,570	3,311,081	419,511	15%
AIDS research included above	[239,190]	[244,623]	[5,433]	2%

Note: Staff and funds that supported the research contract effort located at the NCI at Frederick were transferred into the NCI Intramural Research program in FY2000

* Does not include \$3.5 million received by the NCI from the US Postal Service's sale of the Breast Cancer Stamp

Percent Share of Total NCI Dollars

Summary Points

- Cancer Prevention and Control's part of the budget has increased from 9.6% to 11.8%
- Intramural Research's share has declined from 18.0% to 15.3%
- Other mechanisms show slight shifts in their percentage share
- To move a percentage point in FY 2000 would have required a redirection of approximately \$33 million

	1996	1997	1998	1999	2000
Research Project Grants	45.9%	47.0%	48.7%	47.1%	46.1%
Cancer Centers	6.1%	5.5%	5.3%	5.3%	5.1%
SPOREs	1.1%	1.2%	1.2%	1.5%	1.6%

Intramural Research	18.0%	17.3%	17.3%	15.5%	15.3%
R&D Contracts	7.4%	7.7%	6.8%	7.4%	7.6%
Cancer Prevention & Control	9.6%	9.7%	9.9%	10.6%	11.8%

Funding Trends

(in millions)

Summary Points

- The NCI budget has increased by almost \$1.1 billion or 47% from FY1996
- Funds for Research Project Grants have increased 48%, the same rate as the total NCI budget
- SPOREs, Clinical Cooperative Groups, Cancer Prevention & Control, and R&D Contracts have experienced percentage increases greater than the total NCI growth
- Intramural Research and Centers have expanded at a smaller percentage than the total NCI growth

	1996	1997	1998	1999	2000
Total NCI	\$2,254.9	\$2,389.1	\$2,527.5	\$2,891.6	\$3,311.1
Research Project Grants	1,034.5	1,123.3	1,230.8	1,361.8	1,528.0

Research Project Grants

(in thousands)

Summary Points

- 90% of competing dollars supported grants awarded within the established payline; 10% supported grants as an exception to the payline
- RFA funds remained at the FY 1999 dollar level and were 6% of FY 2000 competing dollars
- Monies used to fund exception grants decreased in FY 2000, to 11% of competing funds compared with 18% in FY 1999
- On average grants were reduced 11-12% below recommended levels
- Funds -- \$15 million -- for Accelerated Executive Review permitted the award of 53 grants
- Research applications submitted to NCI increased by approximately 4%

	1999		2000*	
	No.	Amount	No.	Amount
Total RPGs	4,351	\$1,361,773	4,526	\$1,528,001

Percentile funding for R01 grants (R01)	24th		22 nd	
Average cost for competing grants		\$277		\$346
Average reduction below recommended levels		-11%		-10% **

* Does not include \$3.5 million received by the NCI from the US Postal Service's sale of the Breast Cancer Stamp

** P01 round 2 and P01 round 3 average reduction from recommended levels was -15%.

Research Career Awards – “K” Program

(in thousands)

Summary Points

- The Research Career Award mechanism had a 33% growth in FY2000
- K08 Clinical Investigator award, K23 Mentored Patient Oriented and K24 Mid-Career Patient Oriented Awards received funding emphasis
- The National Heart, Lung, and Blood Institute is administering the K30 Institutional Curriculum Awards; NCI’s effort in FY 2000 was \$1.6 million

	1999		2000	
	No.	Amount	No.	Amount

National Cancer Institute

Director's Biography

Richard D. Klausner, M.D.

Dr. Klausner was appointed as the Director of the National Cancer Institute (NCI) on August 1, 1995. From 1984 until 1997 he was Chief of the Cell Biology and Metabolism Branch of the National Institute of Child Health & Human Development. Dr. Klausner received his undergraduate degree from Yale University and his medical degree from Duke University. After post-graduate medical training at Harvard, he began his research career at the National Institutes of Health in 1979.

Dr. Klausner is well known for his contributions to multiple aspects of cell and molecular biology. Over the past several years, he has been recognized as one of the 20 most highly cited scientists in the world in this burgeoning area of biology and biomedical research. Dr. Klausner's research has illuminated the genetics and biochemistry of metals as essential but toxic nutrients for virtually all forms of life, has illuminated the pathways by which molecules traffic and speak to each other within the cell, and has described novel mechanisms by which tumor suppressor genes function.

His work has been recognized with numerous honors and awards including the Dickson Prize and the William Damashek Prize for Major Discoveries in Hematology. In 1993, Dr. Klausner was elected to the National Academy of Sciences and chaired their project charged with writing standards for science education for the United States from kindergarten through 12th grade. This project represents the first comprehensive attempt to describe a vision of scientific literacy for all students and to provide the criteria for the educational system required to achieve the fulfillment of that vision.

Dr. Klausner is the past President of the American Society for Clinical Investigation. In October 1996, he was elected to the Institute of Medicine. He is the author of over 300 scientific articles and several books.

Former Directors of the National Cancer Institute

Samuel Broder, M.D.

December 1988-March 1995

Dr. Broder joined NCI in 1972 as a Clinical Associate in the Metabolism Branch. In 1981, he became Associate Director for NCI's Clinical Oncology Program. In 1985 he led the laboratory team that discovered the therapeutic effects of AZT and other drugs now approved for the treatment of AIDS including DDI and DDC.

Vincent T. DeVita, Jr., M.D.

January 1980 - June 1980 (Acting)

July 1980 - August 1988

Dr. DeVita joined NCI in 1963 as a Clinical Associate in the Laboratory of Chemical Pharmacology. He served NCI as head of the Solid Tumor Service, Chief of the Medicine Branch, Director of the Division of Cancer Treatment and Clinical Director prior to his appointment as Director of NCI.

Arthur Canfield Upton, M.D.

July 1977 - December 1979

Prior to his tenure as NCI Director, Dr. Upton served as Dean of the School of Basic Health Sciences at the State University of New York at Stony Brook.

Frank Joseph Rauscher, Jr., Ph.D.

May 1972 - October 1976

Dr. Rauscher served as Scientific Director for Etiology, NCI, prior to his appointment as Director of NCI in 1972.

Carl Gwin Baker, M.D.

November 1969 - July 1970 (Acting)

July 1970 - April 1972

During his tenure with PHS, Dr. Baker served as Scientific Director for Etiology, NCI, and as Acting Director of NCI prior to his appointment as Director in July 1970.

Kenneth Milo Endicott, M.D.

July 1960 - November 1969

Dr. Endicott served as Chief of the Cancer Chemotherapy National Service Center, PHS, and as Associate Director, NIH, prior to being appointed Director, NCI in July 1960.

John Roderick Heller, M.D.

May 1948 - June 1960

Dr. Heller joined PHS in 1934 and became Chief of the Venereal Disease Division prior to his appointment as Director of NCI in 1948.

Leonard Andrew Scheele, M.D.

July 1947 - April 1948

Dr. Scheele served in various capacities during his tenure with PHS prior to his appointment as Assistant Chief and, subsequently, Director of NCI in July 1947.

Roscoe Roy Spencer, M.D.

August 1943 - July 1947

Dr. Spencer became NCI's first Assistant Chief and, subsequently, was appointed Director of the Institute in 1943.

Carl Voegtlin, Ph.D.

January 1938 - July 1943

Dr. Voegtlin served as Professor of Pharmacology and Chief of the Division of Pharmacy at the Hygienic Laboratory prior to becoming the first Director of NCI in 1938.

National Cancer Advisory Board

Membership and Term

- 2002 **Chairperson**
Phillip A. Sharp, Ph.D.
Center for Cancer Research

The Honorable Donna E. Shalala, Ph.D.
Secretary
Department of Health and Human Services
Washington, D.C. 20201

Alternates to Ex Officio Members

Steven K. Akiyama, Ph.D.
Associate Director for Research and Training
Division of Intramural Research
National Institute of Environmental Health Sciences
National Institute of Health
Research Triangle Park, NC 27709
(Kenneth Olden, Ph.D. - NIEHS)

Michael A. Babich, Ph.D.
Directorate for Health Science
U.S. Consumer Product Safety Commission
Bethesda, Maryland 20814
(Ms. Ann Brown U.S. CPSC)

Peter Kirchner, Ph.D.
Program Manager
Office of Biological & Environmental Research
Division of Medical Science
U.S. Department of Energy
Germantown, MD 20874-1290
(Ari Patrinos, Ph.D. - DOE)

Alison Martin, M.D.
Division of Oncology FDA
Food and Drug Administration
Rockville, Maryland 20857
(Jane E. Henney, M. D. - FDA)

Hugh W. McKinnon, M.D., M.P.H.
Associate Director for Health
National Risk Management Research
Laboratory (MD-225)
U.S. Environmental Protection Agency
Cincinnati, Ohio 45268
(Ms. Carole M. Browner - EPA)

T. G. Patel, M.D., M.A.C.P.
Captain MC USN (Retired)
Program Chief
Veterans Health Administration
Department of Veterans Affairs
Washington, DC 20420
(Kenneth W. Kizer, M.D. - VA)

Eugene Schwartz, M.D.
Medical Officer
Office of Occupational Medicine
Department of Labor, OSHA
Washington, D. C. 20210
(The Honorable Alexis M. Herman - DOL)

NCAB SUBCOMMITTEE ASSIGNMENTS

Subcommittee on Activities and Agenda

Dr. Phillip Sharp - Chair
Dr. Frederick P. Li
Dr. Susan M. Love
Dr. Arthur W. Neinhuis
Dr. Larry Norton
Ms. Ellen Stovall
EXECUTIVE SECRETARY: Dr. Marvin Kalt
(301) 496-5147

Subcommittee on Cancer Centers

Dr. Arthur W. Nienhuis - Chair
Dr. James O. Armitage
Dr. Richard J. Boxer
Dr. Ralph S. Freedman
Dr. Elmer E. Huerta
Dr. Larry Norton
Dr. Kenneth Olden (NIEHS, Ex Officio)
Dr. Amelie G. Ramirez
Dr. Phillip A. Sharp (Ex Officio)
EXECUTIVE SECRETARY: Dr. Brain Kimes
(301) 496-8537

Subcommittee on Clinical Investigation

Dr. Larry Norton - Chair
Dr. Samir Abu-Ghazaleh
Dr. James O. Armitage
Dr. Richard J. Boxer
Dr. Ralph S. Freedman
Dr. James H. French
Dr. Elmer E. Huerta
Dr. Susan M. Love
Dr. Alison Martin (FDA, Ex Officio)
Dr. Ivor Royston
Ms. Ellen Stovall
ACTG. EXECUTIVE SECRETARY: Dr. Ellen Feigal
(301) 496-2522

Subcommittee on Special Actions

Dr. Frederick Li - Chair
Committee of the Whole
Dr. Phillip A. Sharp (Ex Officio)
EXECUTIVE SECRETARY: Dr. Marvin Kalt
(301) 496-5147

Subcommittee on Planning and Budget

Ms. Ellen Stovall - Chair
Mr. Stephen Duffy
Hon. James E. McGreevey
Dr. Sandra Millon-Underwood
Dr. Arthur W. Nienhuis
Dr. Amelie G. Ramirez
Dr. Phillip A. Sharp (Ex Officio)
EXECUTIVE SECRETARY: Ms. Cherie Nichols
(301) 496-5515

Ad Hoc Subcommittee on Confidentiality

Dr. Frederick Li - Chair
Dr. Samir Abu-Ghazaleh
Mr. Stephen C. Duffy
Dr. Ivor Royston
Ms. Ellen Stovall
EXECUTIVE SECRETARY: Ms. Mary McCabe
(301) 496-6404

Ad Hoc Subcommittee on Communications

Dr. Susan M. Love - Chair
Dr. Richard J. Boxer
Mr. Steven C. Duffy
Dr. James H. French
Hon. James McGreevey
Dr. Amelie G. Ramirez
Ms. Ellen Stovall
EXECUTIVE SECRETARY: Dr. Susan Sieber
(301) 496-5946

Ad Hoc Subcommittee on Coding for Research on Minorities

Dr. Frederick Li - Chair
Dr. Elmer Huerta
Dr. Sandra Millon-Underwood
Dr. Larry Norton
Dr. Amelie G. Ramirez
EXECUTIVE SECRETARY: Dr. Susan Sieber
(301) 496-5946

Source: Cancer Facts & Figures-2000, American Cancer Society (ACS), Atlanta, Georgia 2000.
Excludes basal and squamous cell skin and in situ carcinomas except urinary bladder.
Incidence projections are based on rates from the NCI SEER Program 1979-1996.

The Cost of Cancer

The direct medical cost of cancer is derived from the national data on costs per treatment episode. This estimate does not include the cost of the productivity lost while individuals are away from work due to treatment or disability or the value of lost productivity due to premature death. Figures for the direct medical cost of cancer and expenditures for all personal health care for 1995 are as follows:

(in Millions)	
All Costs	Direct Cost
All Cancers*	\$ 41,200
All Health Care	\$878,464
Percent Relationship of Cancer to All Health	5%

*Hodgson TA, Cohen AJ. 1999. Medical Expenditures for major diseases. Health Care Financing Review, 21:119-64.

NIH Management Fund Reimbursement Fiscal Year 2000

(Dollars in Thousands)

DISTRIBUTION OF NCI PAYMENT	Amount	Share of NCI
Clinical Center	\$67,967	51.0%
Center for Scientific Review	5,221	3.9%
Center for Information Technology	6,575	4.9%
GSA Rental Payments for Space	14,211	10.7%
Other Research Services	35,109	26.3%
Other OD	4,170	3.1%
Total, NCI Payment	133,253	100.0%
Other NIH Institutes Management Fund	379,482	
NIH Management Fund	\$512,735	

The Management Fund provides for the financing of certain common research and administrative support activities which are required in the operations of NIH:

Clinical Center: Admissions and followup, anesthesiology, diagnostic x-ray, nuclear medicine, clinical pathology, blood bank, rehabilitation medicine, pharmacy, medical records, nursing services, patient nutrition service, housekeeping services, laundry, and social work

Center for Scientific Review: Initial scientific review of applications, assignment of research grant applications to institutes

Center for Information Technology: Research and development program in which concepts and methods of computer science are applied to biomedical problems

GSA Rental Payments for Space: Building rental including utilities and guard services

Other Research Services: Procurement, safety, engineering, biomedical engineering, veterinary resources, and library

Special Sources of Funds

CRADAs

As a result of the Federal Technology Transfer Act of 1986 (PL 99-502), government laboratories are authorized to enter into Cooperative Research and Development Agreements (CRADAs) with private sector entities. Licensing agreements are usually incorporated into the CRADA document which addresses patent rights attributable to research supported under the CRADA.

CRADA Receipts Deposited to the U.S. Treasury
(Dollars in Thousands)

Fiscal Year	Carryover from Prior Year	Collections	Obligations
1992	\$101	\$1,627	\$466

2001	6,367		

Royalty Income

NCI retains a portion of the royalty income generated by the patents related to NCI-funded research. A major portion of this royalty income is used to reward employees of the laboratory, further scientific exchange and for education and training in accordance with the terms of the Federal Technology Transfer Act (PL 99-502). Receipts are also used to support costs associated with processing and collecting royalty income and for technology transfer efforts in NCI and NIH.

Breast Cancer Emergency Supplement – Flood Money

The Emergency Supplement Appropriations Act (PL 105-18) of June 1997, appropriated \$15,000,000 to the Department of Health and Human Services to support high priority health research in the area of environmental influences on breast cancer. \$12,000,000 of the funds were transferred to NCI to support breast cancer research. In FY 1999, NCI obligated \$9,748,403. In FY 2000, NCI obligated \$215,400 with the remaining \$2,423,481 to be used in FY 2001.

Stamp Out Breast Cancer

The Stamp Out Breast Cancer Act (PL 105-41) was established in August 1997 and extended in July 2000 (PL 106-253). This act allows postal customers to contribute to funding for breast cancer research through their voluntary purchases of special rate postage stamps from U.S. Postal Service. The Act required the USPS to transfer 70% to NIH and 30% to the DOD of the funds collected above the postage costs and administrative costs. As of July 2000, NCI has received \$7,251,243. NCI will use the funds to fund research projects directed towards breast cancer, specifically, those grants in response to the NCI RFA for "Insight Awards to Stamp Out Breast Cancer." In FY 2000, 34 R21 grants have been awarded among 398 R21 applications for \$3,498,708 for one year. The second year of the insight awards will be paid in FY 2001.

Research Funding for Various Research Areas

(Dollars in Millions)

The National Cancer Institute reports how appropriated funds are spent in a number of different categories or classifications including specific cancer sites, cancer types, diseases related to cancer, as well as types of research mechanisms. The table below represents funding levels for frequently requested research areas. These research areas do not represent the entire NCI research portfolio. Funding for these areas can overlap and do not add to the total NCI budget. For example, dollars for a clinical trial on breast cancer research would be included in both the Breast Cancer and the Clinical Trials lines in the table below. Similarly, a basic cancer research project may be relevant to cervical, uterine and ovarian cancers and relevant funding would be included in the figures for all three sites.

	1996	1997	1998	1999	2000
Total NCI Budget	\$2,254.9	\$2,389.1	\$2,551.3	\$2,891.0	\$3,311.1

Activity Code Descriptions

R01	Research Project (Traditional) discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing his/her specified interest and competencies.
P01	Research Program Projects broadly based, multidisciplinary, often long-term, research program which has a specific major objective or a basic theme. A program project is directed toward a range of problems having a central research focus in contrast to the usually narrower thrust of the traditional research project.
R35	Outstanding Investigator Grants long-term support to an experienced investigator with an outstanding record of research productivity. This support is intended to encourage investigators to embark on long-term projects of unusual potential in a categorical program area.
R37	Method to Extend Research in Time (MERIT) Award long-term grant support to investigators whose research competence and productivity are distinctly superior and who are highly likely to continue to perform in an outstanding manner. Investigators may not apply for a MERIT award. Program staff and/or members of the cognizant National Advisory Council/Board will identify candidates for the MERIT award during the course of review of competing research grant applications prepared and submitted in accordance with regular PHS requirements.
R29	First Independent Research Support and Transition (FIRST) Award sufficient initial period of research support for newly independent biomedical investigators to develop their research capabilities and demonstrate the merit of their research ideas.
RFA	Request for Applications A formal statement inviting grant or cooperative agreement applications in a well-defined scientific area to accomplish specific program purposes and indicates the amount of funds set aside for the competition and/or the estimated number of awards to be made.
U01	Research Project (Cooperative Agreement) discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing his/her specific interest and competencies.
R03	Small Grants research support specifically limited in time and amount for studies in categorical program areas. Small grants provide flexibility for initiating studies, which are generally for preliminary short-term projects and are non-renewable.
R21	Exploratory/Developmental Grants Phase I development of new research activities in categorical program areas. Support generally is restricted in level of support and in time.
R33	Exploratory/Developmental Grants Phase II development of new research activities in categorical program areas. Support generally is restricted in level of support and in time.
R15	Academic Research Enhancement Award (AREA) to domestic health professional schools and other institutions offering baccalaureate or advanced degrees in health sciences, except those that have received NIH research grants and/or cooperative agreements. Supports feasibility studies and other small-scale research projects.
R55	Shannon Awards limited support to scientists whose research applications fall short of the cutoff for funding yet are at the "margin of excellence" whereby the perceived quality of the grant is statistically indistinguishable from grants that are funded.
R41	Small Business Technology Transfer (STTR) Grants - Phase I establish the technical merit and feasibility of R&D ideas which may ultimately lead to a commercial product(s) or service(s).
R42	Small Business Technology Transfer (STTR) Grants - Phase II establish the technical merit and feasibility of R&D ideas which may ultimately lead to a commercial product(s) or service(s).
R43	Small Business Innovation Research (SBIR) Grants - Phase I projects limited in time and amount, to establish the technical merit and feasibility of R&D ideas which may ultimately lead to a commercial product(s) or service(s).
R44	Small Business Innovation Research (SBIR) Grants - Phase II in-depth development of R&D ideas whose feasibility has been established in Phase I and which are likely to result in commercial products or services.

Specialized Programs of Research Excellence, Fiscal Year 2000

(Dollars in thousands)

In 1992, the NCI established the Specialized Programs of Research Excellence (SPORE). This program promotes interdisciplinary research and speeds the bidirectional exchange between basic and clinical science to move basic research findings from the laboratory to applied settings involving patients and populations. The goal of the SPORE program is to bring to clinical care settings novel ideas that have the potential to reduce cancer incidence and mortality, and to improve survival, and the quality of life.

Laboratory and clinical scientists work collaboratively to plan, design and implement research programs that impact on cancer prevention, detection, diagnosis, treatment and control. To facilitate this research, each SPORE develops and maintains specialized resources that benefit all scientist working on the specific cancer site, as well as SPORE scientists. An additional SPORE element is a career development program that recruits scientists both within and outside the SPORE institution to enlarge the cadre of laboratory and clinical scientists dedicated to translational research on human cancer. SPOREs meet annually to share data, assess research progress, identify new research opportunities and establish research priorities.

Mechanism	Site	No.	Amount
SPOREs	Breast	9	\$19,436
	Gastrointestinal	2	4,245
	Lung	3	6,400
	Prostate	4	10,335
	Ovarian	4	7,790
	Total P50	22	48,206
Supplement	DNA Array		1,209
	Mammalian Models		439
	Minority Biomedical Supplements		339
	Total Supplement		1,987
Co-funded	Urology with NIDDK	(3)	523
	Oral with NIDCR	(3)	1,166
	Genome with NHGRI	(1)	400
	Total Cofunded	(7)	2,089
Total		22	\$52,282

NOTE:

Counted P50s when they are funded as a supplement (T-3) with no other non-competing or competing support.

2001.....	4,135,000,000
2002.....	5,030,000,000

The National Cancer Act in December 1971, included a provision for the Director, NCI to submit an annual budget request directly to the President, with comment only by NIH and DHHS. This Bypass Budget was first submitted for 1973.

Bypass Requests and Appropriations of the NCI 1973-2001

Comparison of Dollars, Positions and Space Fiscal Years 1991-2000

Funds are obligations against the annual appropriation in millions of dollars

FTEs are the number of workyears for appointed employees of the NCI. A workyear equal 2080 hours.

195 contract staff are converted to NCI appointments.

Space is thousands of sq feet excluding the Frederick Cancer Research and Development Center.
