Subject: NCI Bid Board Posting – Molecular combing system containing premium kits contains instrument and reagents.

One of the major experiment that is frequently used to study cell cycle regulation and associated DNA replication is how chemotherapeutic drugs affect DNA replication the strands themselves. Ongoing NIH projects in the lab study the effect of checkpoint inhibitors and DNA damaging agents on the DNA replication and cell cycle pathways. The effect of these drugs on DNA replication is studied by techniques such as DNA fiber assays which is often used in our lab. But currently, we use gravity methods that results in overlapping DNA strands that are often unreliable and difficult to repeat. The Molecular DNA combing system is a unique one of a kind equipment that stretches out the DNA strands to yield clean, highly reproducible results that can be published with greater confidence. This is a patented technology that is produced only by this manufacturer and is available solely from this source. Results from the equipment will yield highly reproducible and reliable data that will benefit all ongoing NIH projects in the lab and will help advance our studies into drug resistance and how to overcome them which can be later applied to ongoing clinical trials using DNA damaging agents.

This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine is the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on June 11, 2020 ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

Genomics Vision SA is the only manufacture that makes an equipment of this nature that is capable of doing this type of assay. Without this equipment, we cannot yield clean and highly reproducible results that will benefit NIH projects into drug resistance and how to overcome them. We are hopeful these results will be applied to ongoing clinical trials in the near future. Genomics Vision SA has patented this method of Molecular DNA combing system and there are no other manufacturers in the world that can make this type of equipment.

1.0 TITLE

Therapeutic modulation of DNA repair and related pathways in women's cancer

2.0 BACKGROUND

Our studies are focused towards understanding and delineating molecular pathways that regulate drug resistance in cancer patients. On the clinical side, our projects involve clinical translational work that involve the use of patient samples from those enrolled in over 5 clinical trials that are being currently run under Dr. Lee, the PI of our lab. Besides the translational work being performed, our lab also studies the cell cycle regulatory pathway and the DNA damage repair pathway and the molecular basis for their modulation with relation to the development of resistance to chemotherapeutic drugs that target the same pathways.

One of the major experiment that is frequently used to study cell cycle regulation and associated DNA replication is how the drugs affect DNA replication the strands themselves. Using traditional DNA fiber assays, DNA is coated on slides by gravity method, which is very error prone and often yields overlapping DNA molecules that confounds analysis. The Molecular DNA combing system is a unique one of a kind equipment that stretches out the DNA strands to yield clean, highly reproducible results that can be published with greater confidence. This is a patented technology that is produced only by this manufacturer and is available solely from this source.

The following clause is applicable to all Purchase Orders, Task or Delivery Orders, and Blanket Purchase Agreement (BPA) Calls: PROMPT PAYMENT (JUL 2013) FAR 52.232-25. Highlights of this clause and NIH implementation requirements follow:

I INVOICE REQUIREMENTS

- A. An invoice is the Contractor's bill or written request for payment under the contract for supplies delivered or services performed. A proper invoice is an "Original" which must include the items listed in subdivisions 1 through 12, below, in addition to the requirements of FAR 32.9. If the invoice does not comply with these requirements, the Contractor will be notified of the defect within 7 days after the date the designated billing office received the invoice (3 days for meat, meat food products, or fish, and 5 days for perishable agricultural commodities, dairy products, edible fats or oils) with a statement of the reasons why it is not a proper invoice. (See exceptions under II., below.) Untimely notification will be taken into account in the computation of any interest penalty owed the Contractor.
1. Vendor/Contractor: Name, Address, Point of Contact for the invoice (Name, title, telephone number, e-mail and mailing address of point of contact).
 2. Remit-to address (Name and complete mailing address to send payment).
 3. Remittance name must match exactly with name on original order/contract. If the Remittance name differs from the Legal Business Name, then both names must appear on the invoice.
 4. Invoice date.
 5. Unique invoice #s for all invoices per vendor regardless of site.
 6. NBS document number formats must be included for awards created in the NBS: Contract Number; Purchase Order Number; Task or Delivery Order Number and Source Award Number (e.g., Indefinite Delivery Contract number; General Services Administration number); or, BPA Call Number and BPA Parent Award Number.

must be referenced on the invoice. The VIN is the number that appears after the contractor's name on the face page of the award document.

9. Identify that payment is to be made using a three-way match.
10. Description of supplies/services that match the description on the award, by line billed.*
11. Freight or delivery charge must be billed as shown on the award. If it is included in the item price do not bill it separately. If identified in the award as a separate line item, it must be billed separately.
12. Quantity, Unit of Measure, Unit Price, Extended Price of supplies delivered or services performed, as applicable, and that match the line items specified in the award.*

* NOTE: If your invoice must differ from the line items on the award, please contact the Contracting Officer before submitting the invoice. A modification to the order or contract may be needed before the invoice can be submitted and paid.

B. Shipping costs will be reimbursed only if authorized by the Contract/Purchase Order. If authorized, shipping costs must be itemized. Where shipping costs exceed \$100, the invoice must be supported by a bill of lading or a paid carrier's receipt.
