Subject: NCI Bid Board Posting – Circular RNA V2.0 Human 8x15K Micro Array Service - ROB lab.

Rob is requesting the purchase of a large volume of Fetal Bovine Serum (FBS), a critical component of cell culture media. The laboratory's primary focus is to advance research and develop novel therapies for children with solid tumors. Many of the research projects in the lab involve the in-vitro growth of specific cancer cell lines. Due to the unique biology of these cells, their phenotype can be seriously altered based on the growth conditions, such as the media the cells are cultured in. It was determined that not only does FBS vary from company to company, but also there is intra-company variation from lot to lot. In order to have consistent growth phenotype of their cell cultures (and thus better able to produce reliable and consistent data) the need for a consistent source of FBS becomes essential. Having a consistent source of FBS results in experiments to be optimally performed and generate data that can move the scientific projects forward.

This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on June 10, 2021 ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

The laboratory performed a series of in - vitro experiments testing the effect of FBS (from different companies and lots) on the growth of neuroblastoma cell lines. The lab tested multiple lots from different companies (please see enclosed experimental results). FBS from different sources and lots did not yield consistent results from past experiments. Based on the growth curves achieved from testing the different source/lots of FBS, as well as other growth phenotypes and response to retinoic acid, it was determined that the FBS from Bio-technique was the best source. Purchasing this large volume will allow for experimental consistency over a long period of time, which is crucial for comparing data generated during this period.

1.0 TITLE

Identification of radiation responsive circular RNAs in human aortic endothelial cells

2.0 BACKGROUND

Circular RNAs are emerging as important regulatory molecules in cellular processes and as biomarkers. We have performed a study in our lab to identify radiation responsive circular RNAs in PC3 cell-line and human aortic endothelial cells. We found a huge number of circRNAs regulated in response to radiation.

Since endothelial cells are a source for releasing biomarkers of radiation injury into the circulation, we want to identify circRNAs which are regulated in a radiation responsive manner in these cells.

This study aims to add on to the previous endothelial cells study.

2.1 OBJECTIVE

The objective is to perform all the steps starting from RNA QC check, cDNA synthesis, Labeling, hybridization, data acquiring, export and primary analysis.

3.0 SCOPE

The contractor shall perform all the above objectives and communicate data and results as soon as it is acquired. The contractor shall relay information on RNA quality. At the end of the performance period contractors shall deliver all the data in the form of raw data files, preliminary statistical analysis reports, and concerns.

4.0 CONTRACT REQUIREMENTS/ AND PERSONNEL QUALIFICATIONS

The contractor shall perform:

1. RNA QC
 - Determine the purity and concentration of total RNA
 - Assess the integrity of total RNA
2. RNase R treatment
3. cDNA synthesis
4. Labeling
5. Array hybridization, washing, and scanning
6. Data extraction, analysis and summarization

5.0 TYPE OF ORDER

This is a firm fixed price purchase order.

1.0 TITLE

Identification of radiation responsive circular RNAs in human aortic endothelial cells

2.0 BACKGROUND

Circular RNAs are emerging as important regulatory molecules in cellular processes and as biomarkers. We have performed a study in our lab to identify radiation responsive circular RNAs in PC3 cell-line and human aortic endothelial cells. We found a huge number of circRNAs regulated in response to radiation.

Since endothelial cells are a source for releasing biomarkers of radiation injury into the circulation, we want to identify circRNAs which are regulated in a radiation responsive manner in these cells.

This study aims to add on to the previous endothelial cells study.

2.1 OBJECTIVE

The objective is to perform all the steps starting from RNA QC check, cDNA synthesis, Labeling, hybridization, data acquiring, export and primary analysis.

3.0 SCOPE

The contractor shall perform all the above objectives and communicate data and results as soon as it is acquired. The contractor shall relay information on RNA quality. At the end of the performance period contractors shall deliver all the data in the form of raw data files, preliminary statistical analysis reports, and concerns.

4.0 CONTRACT REQUIREMENTS/ AND PERSONNEL QUALIFICATIONS

The contractor shall perform:

1. RNA QC
 - Determine the purity and concentration of total RNA
 - Assess the integrity of total RNA
2. RNase R treatment
3. cDNA synthesis
4. Labeling
5. Array hybridization, washing, and scanning
6. Data extraction, analysis and summarization

5.0 TYPE OF ORDER

This is a firm fixed price purchase order.

STATEMENT OF WORK (SOW)

6.0 PERIOD OF PERFORMANCE

The period of performance shall be 45 days after the award of the contract.

7.0 PLACE OF PERFORMANCE

8.0 REPORT(S)/DELIVERABLES AND DELIVERY SCHEDULE

The contractor shall deliver the following at the end of the contracting period

1. All microarray raw data files generated from the professional analysis softwares
2. Project summary report
3. Analysis report tables in MS Excel format, including:
 - Raw signal and normalized data
 - Differentially expressed circRNAs with a fold-change threshold (usually >2 in either up- or down-regulation directions)
 - Statistics *t*-test and volcano plot (not included if the analyses are not applicable to the experimental design)
 - Box plot and scatter plot
 - Hierarchical clustering heatmap
 - Detailed annotation of circRNA-miRNA association for the differentially expressed circRNAs
4. Sample QC report and Array QC report in PDF format

9.0 PAYMENT

Payment shall be made once Payment authorization requires submission and approval of invoices to the COR and NIH OFM, in accordance with the attached payment provisions listed below:

The following clause is applicable to all Purchase Orders, Task or Delivery Orders, and Blanket Purchase Agreement (BPA) Calls: PROMPT PAYMENT (JUL 2013) FAR 52.232-25. Highlights of this clause and NIH implementation requirements follow:
