Subject: NCI Bid Board Posting – Acquisition of Prostate cancer primary & matched recurrence & metastatic TMAs (tissue microarrays)

The Molecular Imaging Clinic conducts early phase trials of molecular imaging agents and is located in the NIH Clinical Center (Building 10) on the main NIH campus in Bethesda, MD. We investigate diagnostic imaging agents that employ nuclear, optical or magnetic resonance reporters in human subjects. Currently, there are six active human protocols. This effort is supported by a network of chemistry laboratories, including the Chemical Synthesis Center, the Cancer Imaging Program's Scientific Support Laboratory, and the PET Department of the NIH Clinical Center. The goal of the Molecular Imaging Branch (MIB) is to develop targeted imaging methods that accelerate the development of cancer therapies. The MIB is focused on the development and translation of in vivo molecular imaging agents for early detection, monitoring and therapy. Given the high risks and high costs of conducting research in this field, the MIB is well positioned to address the challenges that the field of molecular imaging faces.

The primary objective of the NCI, CCR, Molecular Imaging Branch is to purchase TMAs (tissue microarrays) samples from patient derived prostate tissue. The samples will consist of the patient's original primary prostate cancer along with their matched recurrent and metastatic samples. The samples will be used for staining IHC(Immunohistochemistry) for pre-clinical research.

The Molecular Imaging Branch (MIB) is requesting to purchase TMAs (tissue microarrays) of patient derived samples of prostate cancer primary & matched recurrence & metastatic samples to be used for research from Neta Scientific. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on December 3, 2021. ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

The MIB is requesting to order the TriStar slides from NETA Scientific since TriStar is not registered in sam.gov. NETA is a distributor for TriStar. TriStar is the only provider of the requested product that can be found on the open market. TMAs of patient derived prostate tissue samples are necessary and integral to the successful completion of this project. While there are a few vendors which do sell prostate cancer TMAs (see below market research section), TriStar is the only one which has TMAs of recurrent and metastatic prostate cancer samples that are matched to the same patient's original primary prostate cancer. Having this matched sample correlation is essential for the successful conduct of this experiment because this is the only way to determine whether there are any differences in IHC results of the surface receptors expressed seen on primary vs. recurrent/metastatic samples

If the invoice does not comply with these requirements, the Contractor will be notified of the defect within 7 days after the date the designated billing office received the invoice (3 days for meat, meat food products, or fish, and 5 days for perishable agricultural commodities, dairy products, edible fats or oils) with a statement of the reasons why it is not a proper invoice. (See exceptions under II., below.) Untimely notification will be taken into account in the computation of any interest penalty owed the Contractor.
