Subject: NCI Bid Board Posting – Evaluation of aneuploidy in human brain tumor cells using single cell DNA sequencing (scDNAseq)

The National Cancer Institute (NCI), the Radiation Oncology Branch (ROB) exists to plan and conduct pre-clinical and clinical research on the biologic and therapeutic effects of radiation administered alone or in combination with other modalities of treatment; to develop novel technology and imaging based approaches for radiation oncology; to investigate the natural history of disease to understand and evaluate means of diagnostic assessment for the purpose of optimizing treatment selections; and to provide radiation therapy as well as general oncology consultations for patients admitted to other NIH Clinical Research Center (CRC) clinical services, in a collaborative approach.

The primary objective is to define the degree of aneuploidy on an individual chromosome basis for untreated and TTK inhibitor treated cells using scDNAseq. This will be done for individual cells from control and treated groups. By evaluating individual cells, insight will be generated into whether the changes induced by TTK inhibition affect specific chromosomes or are stochastic events.

The National Cancer Institute plans to purchase Single cell DNAseq from SingulOmics Corporation. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on July 16, 2022. ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

The lab used the NCI CREx service requesting suppliers of scDNAseq. This resulted in 4 potential sources. Of those, only Singulomics was able to sort individual cells (using CellRaft technology) and perform DNAseq on individual cells. No other vendors contacted will be able to supply our direct and unique demand.

STATEMENT OF WORK (SOW)

1.0 TITLE

Investigation of aneuploidy and its manipulation in brain tumor cells using single cell DNA sequencing (scDNAseq)

2.0 BACKGROUND

Aneuploidy, the loss or gain of whole chromosomes, is a distinct characteristic of cancer cells. The specific chromosomes involved vary between tumors and within a given tumor. The intratumor heterogeneity in aneuploidy provides the genetic variation that allows tumor cells to adapt and proliferate in a variety of microenvironments.

Aneuploidy thus contributes to tumor progression, evolution and treatment response. The standard approach to defining aneuploidy involves karyotyping of metaphase cells or interphase fluorescent in situ hybridization for specific chromosomes. While each technique provides an indication of aneuploidy, neither provides a comprehensive evaluation of aneuploidy within a given tumor cell population. More recently scDNAseq procedures have been developed that allow for evaluating the complete chromosome complement in individual tumor cells. Human glioblastoma (GBM) is characterized by extensive intratumor heterogeneity in chromosome complement (i.e., aneuploidy).

Determining how this influences GBM progression and evolution should provide insight not only into GBM biology but should also suggest therapeutic targets. Towards this end, we will use scDNAseq performed on glioblastoma stem-like cells (GSCs) to comprehensively define aneuploidy under basal conditions and after exposure to an inhibitor of TTK, a standard technique for increasing aneuploidy. This data will allow for a comparison of the changes in aneuploidy and changes in cell survival, treatment response and growth as orthotopic brain tumors.

2.1 OBJECTIVE

Define the degree of aneuploidy on an individual chromosome basis for untreated and TTK inhibitor treated cells using scDNAseq. This will be done for individual cells from control and treated groups. By evaluating individual cells, insight will be generated into whether the changes induced by TTK inhibition affect specific chromosomes or are stochastic events.

3.0 SCOPE

We will provide vials of control and TTK inhibitor treated GSCs to Singulomics. They will use CellRaft technology to pick single cells, which will be subjected to their proprietary AccuSomatic amplification. They will then proceed with DNA QC, library, library QC, and sequencing of 1X for 3Gb. The data will be sent to us by AWS electronic data delivery and analyzed by the bioinformatic group in ROB. For control and treated cells, data will be expressed as % deviant from diploid for each chromosome in each cell.

9.0 PAYMENT

STATEMENT OF WORK (SOW)

Payment shall be made by purchase order. Payment authorization requires submission and approval of invoices to the COR and NIH OFM, in accordance with the attached payment provisions listed below:

The following clause is applicable to all Purchase Orders, Task or Delivery Orders, and Blanket Purchase Agreement (BPA) Calls: PROMPT PAYMENT (JUL 2013) FAR 52.232-25. Highlights of this clause and NIH implementation requirements follow:

I INVOICE REQUIREMENTS

- A. An invoice is the Contractor's bill or written request for payment under the contract for supplies delivered or services performed. A proper invoice is an "Original" which must include the items listed in subdivisions 1 through 12, below, in addition to the requirements of FAR 32.9. If the invoice does not comply with these requirements, the Contractor will be notified of the defect within 7 days after the date the designated billing office received the invoice (3 days for meat, meat food products, or fish, and 5 days for perishable agricultural commodities, dairy products, edible fats or oils) with a statement of the reasons why it is not a proper invoice. (See exceptions under II., below.) Untimely notification will be taken into account in the computation of any interest penalty owed the Contractor.
1. Vendor/Contractor: Name, Address, Point of Contact for the invoice (Name, title, telephone number, e-mail and mailing address of point of contact).
 2. Remit-to address (Name and complete mailing address to send payment).
 3. Remittance name must match exactly with name on original order/contract. If the Remittance name differs from the Legal Business Name, then both names must appear on the invoice.
 4. Invoice date.
 5. Unique invoice #s for all invoices per vendor regardless of site.
 6. NBS document number formats must be included for awards created in the NBS: Contract Number; Purchase Order Number; Task or Delivery Order Number and Source Award Number (e.g., Indefinite Delivery Contract number; General Services Administration number); or, BPA Call Number and BPA Parent Award Number.
 7. Data Universal Numbering System (DUNS) or DUNS + 4 as registered in the Central Contractor Registration (CCR).
 8. Federal Taxpayer Identification Number (TIN). In those exceptional cases where a contractor does not have a DUNS number or TIN, a Vendor Identification Number (VIN) must be referenced on the invoice. The VIN is the number that appears after the contractor's name on the face page of the award document.
 9. Identify that payment is to be made using a three-way match.
 10. Description of supplies/services that match the description on the award, by line billed.*
 11. Freight or delivery charge must be billed as shown on the award. If it is included in the item price do not bill it separately. If identified in the award as a separate line item, it must be billed separately.
 12. Quantity, Unit of Measure, Unit Price, Extended Price of supplies delivered or services performed, as applicable, and that match the line items specified in the award.*

STATEMENT OF WORK (SOW)

* NOTE: If your invoice must differ from the line items on the award, please contact the Contracting Officer before submitting the invoice. A modification to the order or contract may be needed before the invoice can be submitted and paid.

- B. Shipping costs will be reimbursed only if authorized by the Contract/Purchase Order. If authorized, shipping costs must be itemized. Where shipping costs exceed \$100, the invoice must be supported by a bill of lading or a paid carrier's receipt.
- C. Mail an original and 1 copy of the itemized invoice to:

National Institutes of Health
Office of Financial Management, Commercial Accounts
2115 East Jefferson Street, Room 4B-432, MSC 8500
Bethesda, MD 20892-8500

For inquiries regarding payment call: (301) 496-6088

In order to facilitate the prompt payment of invoices, it is recommended that the vendor submit a photocopy of the invoice to the "Consignee" designated for the acquisition in blocks 6A – 6E of the face page of the Order/Award document.

II. INVOICE PAYMENT

- A. Except as indicated in paragraph B., below, the due date for making invoice payments by the designated payment office shall be the later of the following two events:
 - 1. The 30th day after the designated billing office has received a proper invoice.
 - 2. The 30th day after Government acceptance of supplies delivered or services performed.
- B. The due date for making invoice payments for meat and meat food products, perishable agricultural commodities, dairy products, and edible fats or oils, shall be in accordance with the Prompt Payment Act, as amended.
