Subject: NCI Bid Board Posting – Mouse Pericyte Spatial Transcriptomics Data Analysis

The Center for Cancer Research (CCR) at the National Cancer Institute (NCI) requires a comprehensive data analysis for optimizing segmentation, phenotyping, classifying, identifying spatial location, comparing populations, and determining unique transcriptomics identifiers of lung pericyte cells from tumor-naïve and tumor-bearing wild-type and KLF4 gene knockout mice.

As part of the National Cancer Institute's Center for Cancer Research, the Murgai lab requires downstream analysis of spatial transcriptomics/Molecular Cartography data collected by Resolve Biosciences. This will allow the lab to optimize segmentation, phenotype, classify, identify spatial location, compare populations, and determine unique transcriptomics identifiers of lung pericyte cells from tumor-naïve and tumor-bearing wild-type and KLF4 gene knockout mice. Ultimately, the analyzed data will provide insight as to whether the KLF4 gene has any importance in the metastatic role of pericyte cells.

To perform this work, the NCI plans to purchase this service request from Omapix Inc., Stanford, CA. This is not a request for a competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on February 17, 2024 ET. A determination by the Government not to compete with this requirement based upon responses to this notice is solely within its discretion. Information received will be considered exclusively to determine whether to conduct a competitive procurement.

Sole Source Justification:

OMAPIX Inc. is well experienced in spatial transcriptomics data analysis and uses a proprietary combination of available data analysis tools on all major platforms, including Molecular Cartography.

STATEMENT OF NEED (SON)

1.0 TITLE

Purchase of data analysis services for the Murgai lab to analyze spatial transcriptomics/Molecular Cartography data collected by Resolve Biosciences.

2.0 BACKGROUND

The Center for Cancer Research (CCR) at the National Cancer Institute (NCI) requires a comprehensive data analysis for optimizing segmentation, phenotyping, classifying, identifying spatial location, comparing populations, and determining unique transcriptomics identifiers of lung pericyte cells from tumor-naïve and tumor-bearing wild-type and KLF4 gene knockout mice.

3.0 TYPE OF ORDER

This is a Firm Fixed-Price Purchase Order.

4.0 SPECIAL ORDER REQUIREMENTS

4.1 PRODUCT FEATURES/SALIENT CHARACTERISTICS

The following salient characteristics are applicable to this acquisition:

- Analysis shall optimize a pipeline for spatial transcriptomics and Molecular Cartography data collected from the Resolve Biosciences platform.
- The pipeline shall perform cell segmentation and detection of the data.
- The pipeline shall segment all data provided for multiple sample types.
- The pipeline shall normalize cell counts for all data provided.
- The pipeline shall phenotype all cells for all data provided.
- The pipeline shall perform spatial and differential analysis for all samples provided.

4.2 DELIVERY / INSTALLATION

The deliverables will be accomplished in a well-structured two-month project. The work packages will be divided into four phases. The details are as follows:

Phase 1 - Method Selection: This will include testing different segmentation pipelines: QuPath cell detection (watershed pixel-based classification), Cellpose and StarDist (machine-learning pixel-based classification) and Baysor (transcript coordinates-based classification). We will iteratively optimize the pipelines to maximize detection of all cell populations in a representative sample chosen. The best-performing method will be chosen based on customer feedback, expected cell sizes and matching image and transcript cloud information.

Timelines ~ 2 weeks

Phase 2-Segmentation execution: In this phase, we will execute the selected segmentation algorithm for all samples and fine-tune settings to maximize consistency between samples (e.g. differences in morphology or staining intensity). We will generate cell boundary files, meta

STATEMENT OF NEED (SON)

information on segmented cells (e.g. centroids, area) and gene-by-cell matrices for visualization and downstream analysis in an R environment.

Timelines: 2 weeks

Phase 3-counts normalization and cell Phenotyping: Raw counts will be normalized using Sctransform as it is the normalization method most suitable for Molecular Cartography datasets. Cell phenotyping will be aided by automatic clustering strategies such as SCINA or CELESTA. To this end, the Murai lab will provide a gene panel annotation to identify which markers genes are expressed by which cell types. The panel can be as simple as providing a list of markers per expected cell type or describee cell-types and sub- types following CELESTA guidelines for panel annotation.

Timelines: 1 week

Phase 4-Spatial & DE Analysis: We will identify changes in transcript signatures in pericytes between conditions and generate cell-cell interaction networks of pericytes with all other cell-clusters in each condition with a focus on distances to blood vessels. Different databases will be queried to correctly annotate cell- and molecule-level interactions identified and to assess consistency of the extracted information.

Timelines: 2 weeks

4.3 TRAINING

Support services shall be provided during normal hours of operation, Monday through Friday (9:00 AM to 5:00 PM EST), excluding Federal holidays found at <https://www.opm.gov/policy-data-oversight/pay-leave/federal-holidays/#url=2020>.

5.0 PAYMENT

Payment shall be made *in full*. Payment authorization requires submission and approval of invoices to the COR and NIH OFM, in accordance with the payment provisions listed below:

The following clause is applicable to all Purchase Orders, Task or Delivery Orders, and Blanket Purchase Agreement (BPA) Calls: PROMPT PAYMENT (JUL 2013) FAR 52.232-25. Highlights of this clause and NIH implementation requirements follow:

I INVOICE REQUIREMENTS

A proper invoice is an "Original" which must include the items listed in subdivisions 1 through 12, below, in addition to the requirements of FAR 32.9. If the invoice does not comply with these requirements, the Contractor will be notified of the defect within 7 days after the date the designated billing office received the invoice (3 days for meat, meat food products, or fish, and 5 days for perishable agricultural commodities, dairy products, edible fats or oils) with a statement of the reasons why it is not a proper invoice. (See exceptions under II., below.) Untimely notification will be taken into account in the computation of any interest penalty owed the Contractor.
 1. Vendor/Contractor: Name, Address, Point of Contact for the invoice (Name, title, telephone number, e-mail and mailing address of point of contact).

STATEMENT OF NEED (SON)

2. Remit-to address (Name and complete mailing address to send payment).
3. Remittance name must match exactly with name on original order/contract. If the Remittance name differs from the Legal Business Name, then both names must appear on the invoice.
4. Invoice date.

8. Federal Taxpayer Identification Number (TIN). In those exceptional cases where a contractor does not have a DUNS number or TIN, a Vendor Identification Number (VIN) must be referenced on the invoice. The VIN is the number that appears after the contractor's name on the face page of the award document.
9. Identify that payment is to be made using a three-way match.
10. Description of supplies/services that match the description on the award, by line billed.*
11. Freight or delivery charge must be billed as shown on the award. If it is included in the item price do not bill it separately. If identified in the award as a separate line item, it must be billed separately.
12. Quantity, Unit of Measure, Unit Price, Extended Price of supplies delivered or services performed, as applicable, and that match the line items specified in the award.*
