Subject: NCI Bid Board Posting – Maintenance Agreement for Dako Artisan Special Stainers

At the National Cancer Institute (NCI), The Laboratory of Pathology (LP) at the National Cancer Institute (NCI) is an integral component of the research and clinical community at the National Institutes of Health (NIH). Our goal is to be a globally recognized center of excellence in disease research, clinical diagnostics, and pathology education. The mission of the Laboratory of Pathology is to achieve the highest level of quality in research, diagnostics, and education.

The primary objective of this purchase is the maintenance for Dako Artisan Special Stainers. The maintenance agreement will ensure that the Dako Artisan Staining Instrument is kept in good working order, providing the government with continued access to its high-quality staining capabilities. This will allow for efficient and accurate analysis of tissue samples, benefiting the government in its efforts to advance medical research and improve healthcare outcomes.

The National Cancer Institute plans to purchase the maintenance for Dako Artisan Special Stainers from Agilent Technologies, to perform this work. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on April 5, 2024, ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

The Dako Artisan Staining Instrument is a crucial tool in patient care, and any delays in its maintenance or repair will compromise the turnaround times of patient diagnoses. As a proprietary product, repairs and maintenance must be carried out by technicians certified by Agilent Technologies. In the past, the federal government attempted to utilize third-party contractors to manage the contract, but this approach proved to be problematic. Whenever a repair request was made, there was a delay of 3 to 5 days, which resulted in unnecessary delays in patient care. Therefore, using a third-party contractor to manage the contract but still paying Agilent Technologies to perform the service is not feasible and ultimately delays patient diagnosis.
