Subject: NCI Bid Board Posting – Biocare intelliPATH FLX Service Contract

At the National Cancer Institute (NCI), The Genitourinary Malignancies Branch focuses on investigating the biology of genitourinary cancers, developing new strategies for treating those cancers, and evaluating these new therapeutic approaches through science-driven clinical research. These clinical trials investigate novel approaches in immunotherapy, hormonal therapy, chemotherapy combinations, and small-molecule targeted therapy. This website provides all interested parties—referring physicians, cancer patients or family members interested in participating in a clinical trial, or researchers looking for collaborative opportunities—with the information they need to get started.

The primary objective of this purchase is to maintain a high standard of performance to preserve high quality reproducible and consistent staining. This instrument is used in the GMB for automated IHC staining of wide format slides of whole mount FFPE prostate tissue sections to characterize tumor foci and protein expression within each sample and support the research projects studying prostate cancer development, progression, and drug resistance.

The National Cancer Institute plans to purchase the Biocare intelliPATH FLX Service Contract from Biocare Medical, to perform this work. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on June 7, 2024, ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

At this time, the manufacturer of the instrument, Biocare Medical, is the only company equipped to provide the necessary warranty support to this instrument. The software and design is proprietary to the manufacturer. Biocare Medical is the only company able to support the current intelliPATH FLX maintenance needs of the LGCP.
