Subject: NCI Bid Board Posting – GeoMx Nanostring Service Maintenance Contract

At the National Cancer Institute (NCI), the CCR's Center for Immuno-oncology (CIO) explores fundamental questions of cancer immunotherapy through rigorous preclinical studies and translates these findings into clinical trials with the goal of developing novel therapies for a spectrum of cancers.

The primary objective of this purchase is to get a GeoMx Nanostring Service Maintenance Contract for 6 months.

The National Cancer Institute plans to purchase a GeoMx Nanostring Service Maintenance Contract from Bruker Spatial Biology, Inc to perform this work. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on August 24, 2024, ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

Market research shows that the GeoMx Nanostring machine is a proprietary research instrument exclusively manufactured by Bruker Spatial Biology. With no alternative manufacturers offering similar products, Bruker Spatial Biology holds a unique position in the market. Their specialized team is uniquely trained and qualified to provide routine maintenance and repairs to the machine. Given the instrument's important role in evaluating the tumor microenvironment for cancer tissues, a sole-source maintenance agreement with Bruker Spatial Biology is strongly justified to ensure the instrument's optimal performance and reliability.
