Subject: NCI Bid Board Posting – Maintenance service agreement of BONDMAX Processing Module

The Department of Health and Human Services (DHHS), National Institutes of Health (NIH), National Cancer Institute (NCI), The goal of the Molecular Imaging Branch (MIB) is to develop targeted imaging methods that accelerate the development of cancer therapies. The MIB is focused on the development and translation of in vivo molecular imaging agents for early detection, monitoring and therapy. Given the high risks and high costs of conducting research in this field, the MIB is well positioned to address the challenges that the field of molecular imaging faces.

The primary objective is to purchase Maintenance service agreement of BONDMAX Processing Module serial number M494048. The instrument allows the researchers to have more time for imaging and other analysis.

The National Cancer Institute plans to purchase a Maintenance service agreement of BONDMAX Processing Module, from Leica Microsystems Inc, Deerfield, IL to perform this work. This is not a request for competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine is the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on October 14, 2024 ET. A determination by the Government not to compete this requirement based upon responses to this notice is solely within the discretion of the Government. Information received will be considered solely for the purpose of determining whether to conduct a competitive procurement.

Sole Source Justification:

The BOND RXm staining module is manufactured and sold by Leica Microsystems. Leica distributes the BOND RXm through Government Scientific Source, but not the service agreements. The repair requires personnel who are familiar with the instrument and have had direct training by Leica. Leica also does not sell their parts to third parties and if a vendor was able to be found, there would be a delay in repairing because the vendor would have to order the part(s) from Leica.
