Subject: NCI Bid Board Posting – Bulk Liquid Nitrogen (LN2) Building 41

Liquid Nitrogen, LN2, is necessary to deeply freeze valuable research cell lines. A constant supply of LN2 is crucial for maintaining temperature in specialized freezers. It is supplied to the National Cancer Institute, Center for Cancer Research, in Building 41 from the bulk tank near the loading dock.

The National Cancer Institute plans to purchase the bulk LN2 from Roberts Oxygen, Gaithersburg, MD. This is not a request for a competitive quotation. However, if any interested party believes it can meet the attached requirements, it may submit a statement of capabilities. The capability statement must be in writing and must contain information and material in sufficient detail to allow NCI to determine if the party can fully meet this requirement. The capability statement must be received in the contracting office by 11:30 AM on January 23, 2025 ET. A determination by the Government not to compete with this requirement based upon responses to this notice is solely within its discretion. Information received will be considered exclusively to determine whether to conduct a competitive procurement.

Sole Source Justification:

Roberts Oxygen Company is the only company that can provide NCI/CCR bulk liquid nitrogen gas with a daily delivery schedule at the NIH campus and is available if an emergency occurs. Their skilled technicians are also readily available if an emergency repair or adjustment is required, ensuring uninterrupted supply and service.
