

Networks for Tobacco Control Research in Africa Pre-Conference Workshop

alongside the African Organization for Research and Training in Cancer (AORTIC) International Conference on Cancer in Africa

**4 November 2019, 1–5 pm
Maputo Radisson Blu Hotel & Residence
Maputo, Mozambique**

You are invited to participate in a dynamic half-day workshop to strengthen tobacco control research networks in Africa and increase collaboration among the research community and practitioners to lead to greater impact on cancer control.

This workshop is an opportunity to:

- Learn about the results of a network analysis survey documenting research activities and connections in Africa, including current efforts and barriers to tobacco control and collaborations among researchers and practitioners.
- Hear from colleagues in Africa that have successfully collaborated to translate tobacco control research into action.
- Exchange ideas through working group discussions to improve collaborations and use research to advance tobacco and cancer control efforts.
- Raise the profile of tobacco control alongside the AORTIC International Conference on Cancer in Africa, the leading African cancer meeting.

The workshop is open to scientists, researchers, health professionals, practitioners, and advocates interested in conducting or using research findings and building connections to advance tobacco control in Africa.

To register for this workshop, please send your name, email address, and organizational affiliation to Meg Keil at megan.keil@nih.gov.

Presented by the U.S. National Cancer Institute, the African Tobacco Control Alliance and the Center for Tobacco Control in Africa.
