### BACKGROUND

Significant advancements in cancer research have led to improved diagnosis, prognosis, and outcomes for cancer patients. Despite this progress, cancer disparities remain among specific populations for numerous types of cancers. An increase in the scope and depth of cancer disparities research, including expansion of the pool of competitive researchers with expertise to conduct cancer disparities research, remains a priority for the NCI and is urgently needed to accelerate the progress in reducing cancer disparities.

### PURPOSE OF PAR-22-114

- Promote cancer disparities research among NCI-funded non-disparity researchers and encourage collaboration with cancer disparities-focused researchers
- Accelerate and strengthen multi-disciplinary cancer disparities research in wide ranging areas. Cancer disparities research includes, but is not limited to basic, translational, behavioral, observational, interventional, environmental and population research studies that address the adverse differences in cancer incidence, prevalence, mortality, survivorship, burden and/or response to treatment in racial/ethnic minorities and/or underserved population groups.
- Proposed collaborations should focus on achieving research objectives that by necessity rely on diverse and complementary expertise, technical capabilities, and resource sets.

### PROGRAM DESCRIPTION/REQUIREMENTS

Parent grant must NOT have proposed cancer disparities research questions as part of the original scientific aims

Proposal is required to be within the scope of the parent award and should expand the original aims to include a cancer disparities research component

Collaborative teams are required between non-cancer disparities investigator (i.e., applicant/parent grant PI) and investigator with cancer disparities expertise (i.e., collaborator)

### DETAILS

Application Due Dates: September 06, 2022; January 23, 2023; September 06, 2023; January 23, 2024; September 06, 2024; January 23, 2025

Budget: \$150,000 direct costs/12 months

Award Project Period: The project and budget periods must be within the currently approved project period for the existing parent award. The maximum period of administrative supplement support that an eligible NCI-funded grant may request is 2 years.

Number of Awards: The NCI intends to commit \$15.3M total costs to fund up to 30 awards over 3 years.
