

The Geographic Management of Cancer Health Disparities Program

The Geographic Management of Cancer Health Disparities Program (GMAP) – consisting of 7 regions and engaging more than 1,200 disparities researchers, diversity trainees, and community health educators – employs a systematic and comprehensive strategy for building region-based “hubs” or networks for the support and efficient management of cancer and cancer health disparities (CHD) research, training and infrastructure.

How Can GMAP Help You?

Fostering cooperation and collaboration among researchers, students and trainees, and community health educators, GMAP seeks to contribute to the science of cancer and CHD research, promote the development of the next generation of competitive, underrepresented cancer and CHD investigators, and enhance access to cancer information and research among underserved communities.

GMAP provides you with enhanced access to career development resources, such as:

- Informational Webinars on Funding Opportunities
- Job Openings
- Networking Opportunities
- Travel/Pilot Project Funding
- Mentoring Connections
- NCI and NIH Updates
- Access to Scientific Resources
- Grant Writing Workshops
- Cancer and Cancer Health Disparities Resources and Tools
- Training Navigation
- Biospecimen/Biobanking

Where is GMAP?

There are seven regional hubs housed at NCI-Designated Cancer Centers across the United States.

Get Involved!

Contact the Regional Coordinating Director in your region or visit your local GMaP website to find out how GMaP can help you.
