Informatics Technology for Cancer Research Program

February 21, 2023, 3-4pm EST Join Here

Juli Klemm, Ph.D.
Program Director in the Center for Strategic Scientific Initiatives, NCI

Objectives:

LO1: Familiarize yourself with open-source software tools that can support clinical, basic, and population science research.

LO2: Identify courses in cancer informatics to enhance your career development plan.

LO3: Pinpoint funding opportunities to support computational research and scientific software development
