

WHO WE ARE

The Division of Cancer Biology (DCB) of the National Cancer Institute (NCI) funds basic research in all areas of **cancer biology** at academic institutions and research foundations across the United States.

DCB activities include:

- Supporting investigator-initiated basic cancer research
- Helping scientists navigate NCI grant policies
- Sharing cancer research resources
- Managing cancer research programs that foster emerging areas and models

WHAT WE FUND

- Biophysics, bioengineering, and comp sciences
- Cancer cell biology
- Cancer immunology, hematology, and etiology
- DNA and chromosome aberrations
- Office of cancer genomics
- Tumor biology and microenvironment
- Tumor metastasis
